

**STOP KILLER ROBOTS**  
**Mines Action Canada**

BROUGHT TO YOU BY M.E.T.A.L

# INTRODUCTION

## IN TODAY'S PRESENTATION...

- Project Objectives
  - Progress Made
  - Mistakes Along the Way
  - Navigating the Design Process
- Looking Ahead

# TABLE OF CONTENTS

## 01 Empathize

- Summary of Research
- Benchmarking Data
- Client Meeting #1

## 02 Define

- Problem Statement
- Design Criteria
- Target Specifications

## 03 Ideate

- Conceptual Designs
- Storyboarding
- Subsystems

## 04 Prototype

- DO & DONTs of prototype 1
- Prototype 2

## 05 Testing results

- Testing VR
- Testing the VFX
- Testing

## 06 Look ahead

- Finalizing the design!

01

# Empathize

Step 1 of Design Process

# LEARN LEARN LEARN

- Ethical dilemmas
  - Accountability
  - Distinguishability
  - Moral decay and dehumanization

- Benchmarking
  - iRobot
  - SnapAI
  - Black Mirror

[Snap](#) is under investigation in the U.K. over potential privacy risks associated with the company's generative artificial intelligence chatbot.

The Information Commissioner's Office (ICO), the country's data protection regulator, issued a preliminary enforcement notice Friday, alleging risks the [chatbot, My AI](#), may pose to Snapchat users, particularly 13-year-olds to 17-year-olds.

China builds Covid quarantine camps

# Client Meeting #1 Takeaways

## Before Client Meeting #1

How do we build this? What should we show? What software do we use?

How long should it be? Should it be specific or general?

## After Client Meeting #1

Focus on Storytelling. Focus on the emotions. Focus on the users.

02

Define

# Problem statement

## What is the problem?

- A world with Autonomous Weapons

## Why is it a problem?

- Who it Impacts
- Ethical issues
- The world will change

## How solve the problem?

- VR world
- 1 minute

# Client's needs

Raw Data	Groupings/ Rating
Clear video	3 - Simplicity
1 min	
Emotions	
Target audience	5 - Provoke urgency
Focusing on the storytelling	
Accessibility	1 -VR Experience
Good experience	
Civilian adaptations	4 - Technological Adaptations
Adaptation over threat	
Cater to random people's knowledge	3- Universal

**\*Rating scale: 1 – Least Important, 5 – Most important**

- What is the Raw Data?
- Purpose of Groupings and rating

# Target Specification

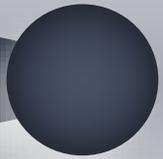

<u>Functional</u>	<u>Non-functional</u>	<u>Constrains</u>
VR Environments	Video narration	Avoid graphic content
One minute video	Complexity of concepts	Generic background
Technical adaptations	Reaction time	Avoid geographical identifiers
Visual elements	Attention Span	Cost (\$)
Auditory elements		
Avoid use of autonomous robots in video		
Evoke emotions		

- Standards set for Target Specification (Units used)
- Method of Verification (calculations, survey, observations, etc.)

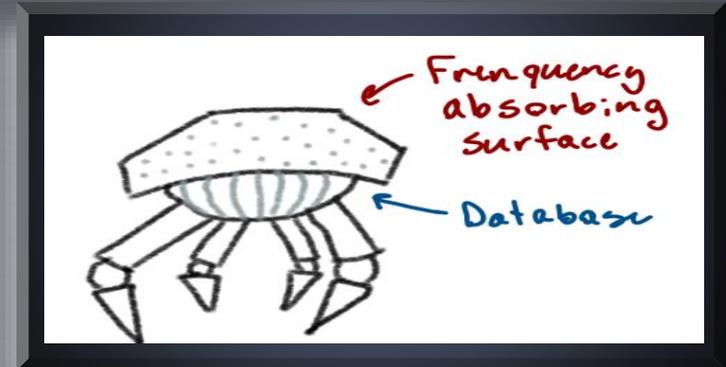

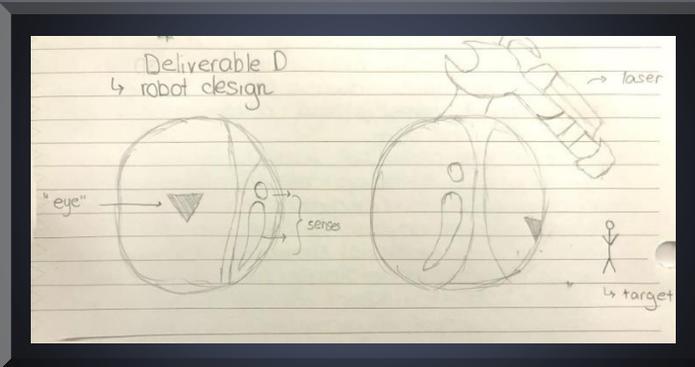

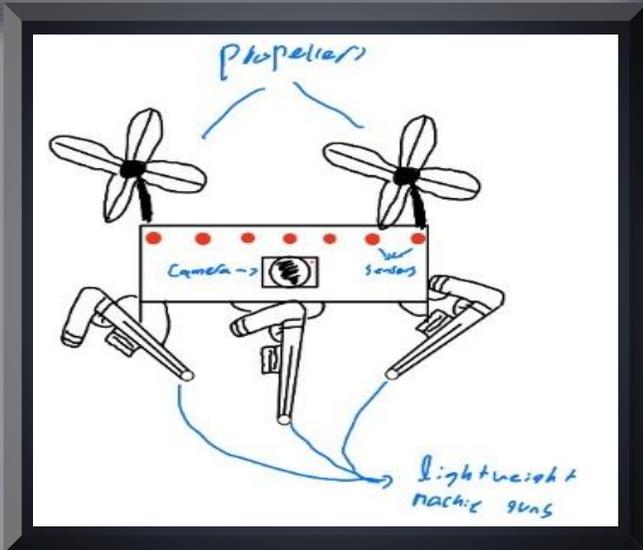

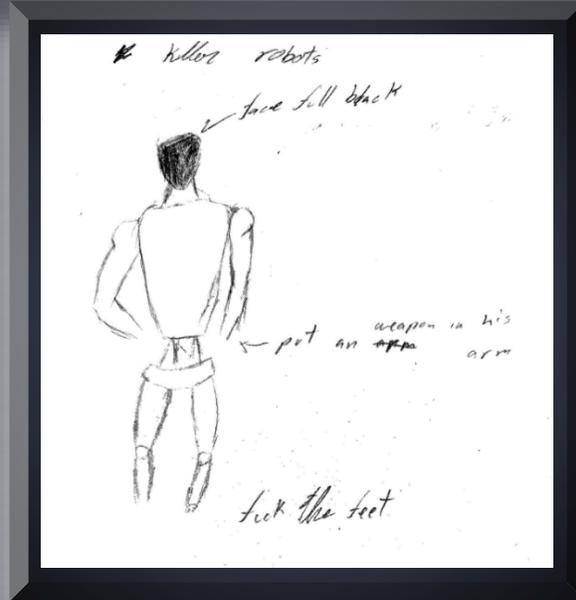

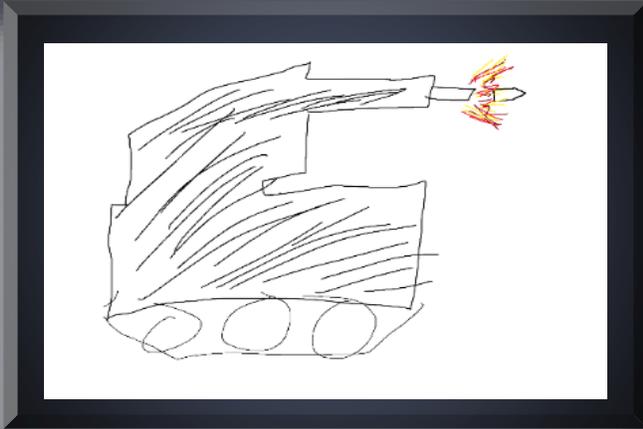

03

Ideate

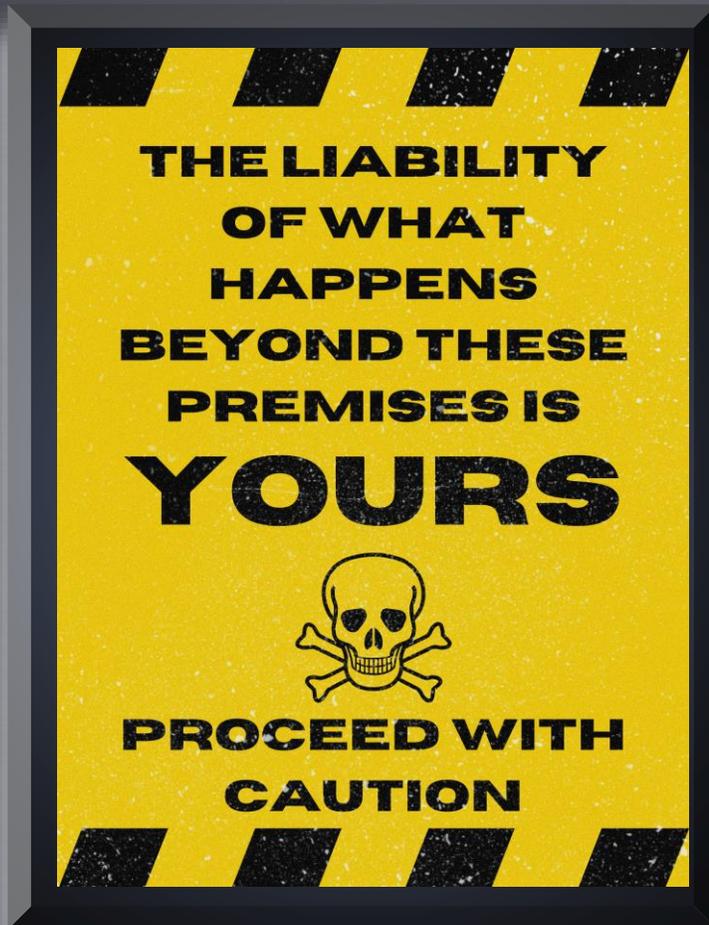

# TECHNICAL ADAPTATIONS

## Deriving Adaptations:

- **CHALLENGE:**  
Navigating the design process within an imagined world

# IMPLEMENTING ADAPTATIONS

**THE LIABILITY  
OF WHAT  
HAPPENS  
BEYOND THESE  
PREMISES IS  
**YOURS****

**PROCEED WITH  
CAUTION**

**EATING MORE  
THAN YOUR  
RATIONS IS A**

**CRIME**

**Great Cyberpunk asset!!**

This is a great Cyberpunk city asset! It is kind of a starter kit because there isn't different options for

# Prototype I

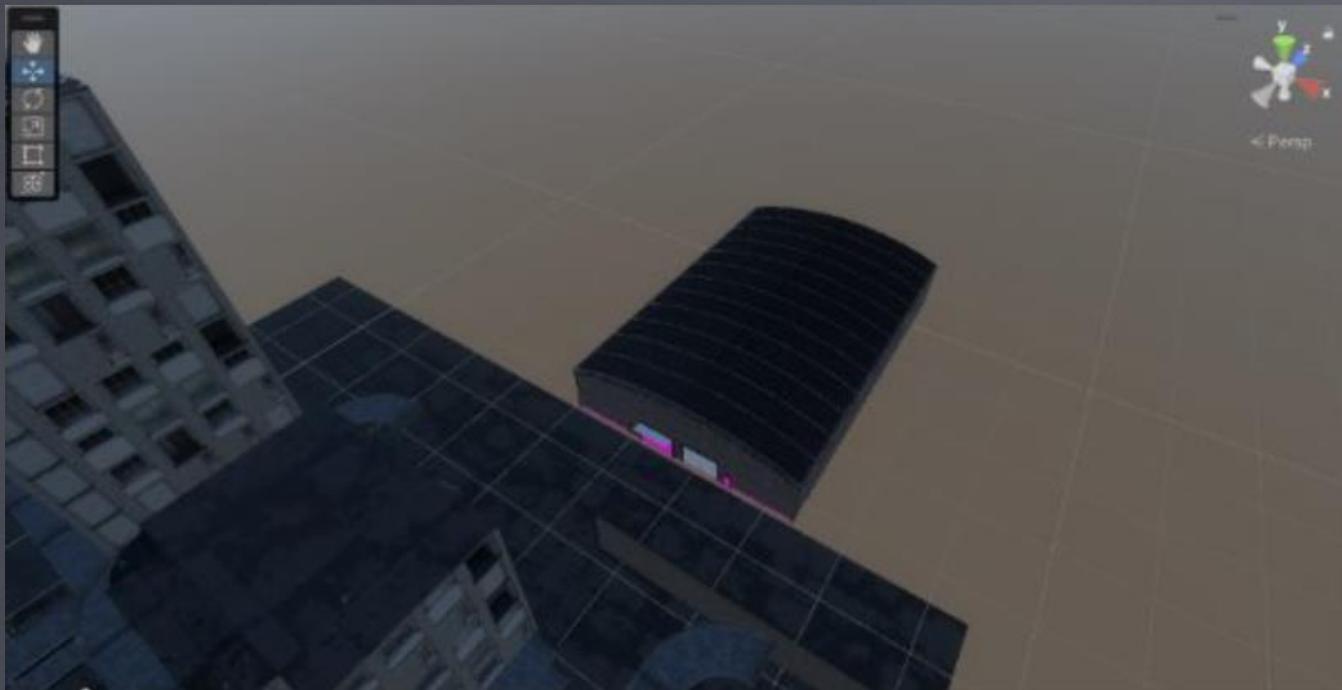

Likes	Dislikes
Good Storyline	Lack of initial clarity
Ethical Concern	Complex
Accessibility	Void of Content
	Little adaptations

# Prototype II

## Changes Made:

- Simplification of Storyline and VR Environments
- Simplification of Video and Interactive VR Experience
- Enhancements for User Understanding
- Refinement of Narration
- Allocation of Budget for Premade Environments.

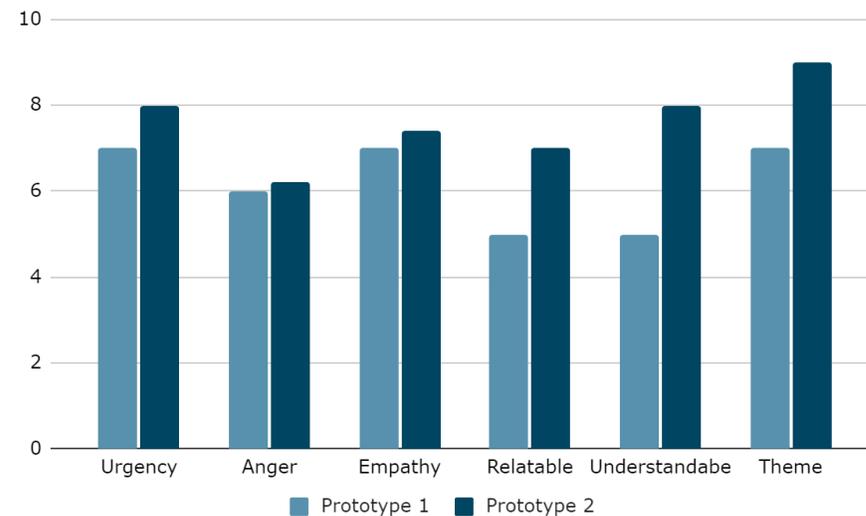

05

Testing Results

using google forms to acquire feedback on our prototypes we were able to pin-point our projects weakness. The feedback showed us that our first prototype wasn't very relatable and was hard to understand;

Table 3. Prototype I & II Survey Testing Results

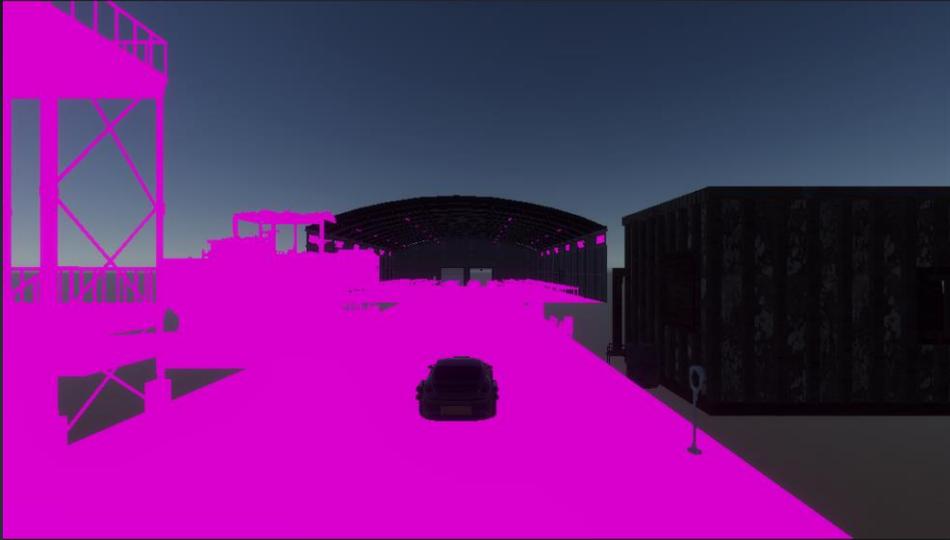

# Simplify

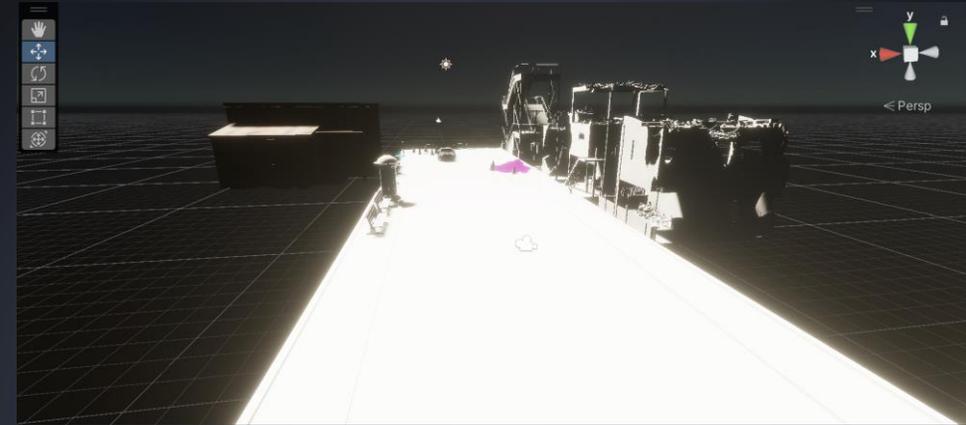

Based on the feedback we decided to use a modular city pack this allowed us to streamline the process of building our environment.

# Testing The VR Environment

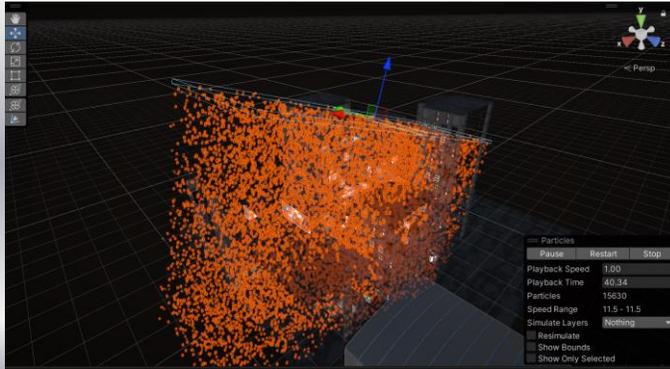

We ran into a problem when changing the render pipeline where most materials would turn pink. To fix this we need to use the HDRP wizard in unity.

We used the HDRP wizard but there is a bug that will crank up the intensity of the light, leaving everything washed out with white light.

# Testing VFX

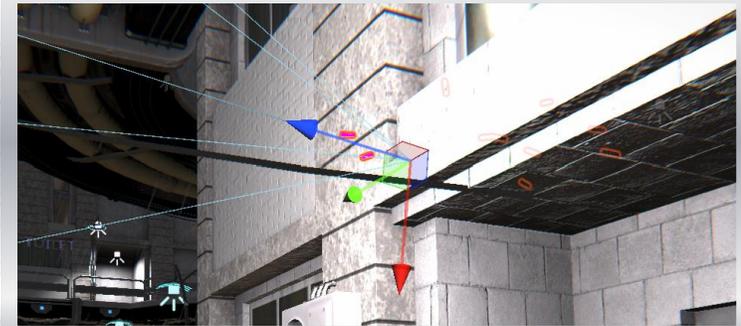

## RAIN

Angling the rain to make it appear that there is wind and it give it a more realistic feel

## PAPER

Pieces of paper floating in the wind

## SPARKS

Sparks coming from electrical wires

A stylized dark blue rocket ship with white text and a circular counter. The rocket is centered within a light blue rectangular frame that has a metallic, 3D effect. The frame has three small dark circles in the top right corner, resembling window control buttons. The rocket has a large dark blue oval body with a white circular counter at the top containing the number '06'. The text 'Look Ahead' is written in a large, bold, white sans-serif font across the middle of the rocket's body. Below it, the text '13 days until design day!' is written in a smaller, white sans-serif font. The rocket has two large, curved white outlines on top and two on the bottom, suggesting wings or stabilizers. Two small dark blue spheres are attached to the sides of the rocket's body.

06

**Look Ahead**

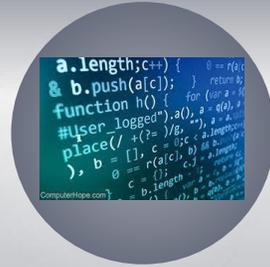

13 days until design day!

# OBJECTIVES

## Add Audio

Rehearse and Record the narration, add footsteps, rain, and ensure the audio is smooth (no bugs)

## Add Scripts

Make sure all the interactions have their appropriate scripts and there are no issues

## Record Video

Record and edit the final video, make sure it is within the parameters (testing)

# Thank you for Listening
