

ELG4125 – Design Simulation

Nima Mehrjoonezhad – 300027431

Kaiy Yuan - 8617972

Overall Design Simulation

The solar power generated is actually 246kW from lab project 2.

According to professor's suggestion we take it as 100kW, which is 0.1MW rounded down as 0MW in display.

The 282Mvar is automatically generated by the simulation.
