

To download the code and try the app for yourself:

1. Go to : <https://github.com/katrinelabonte/HakunaMatataWallet.git>
2. Click the green “Code” button:

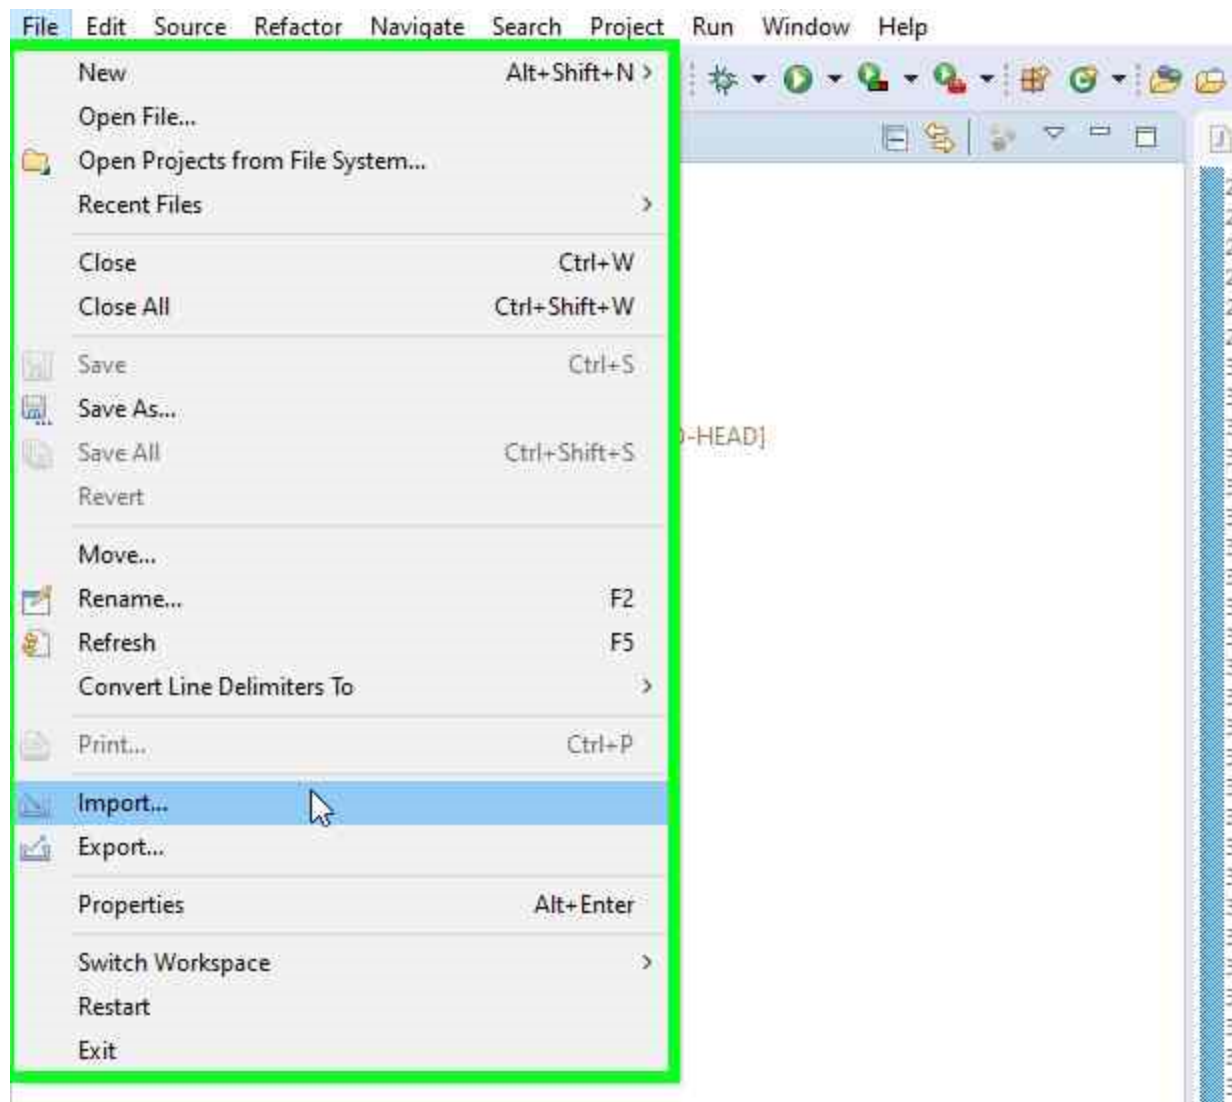

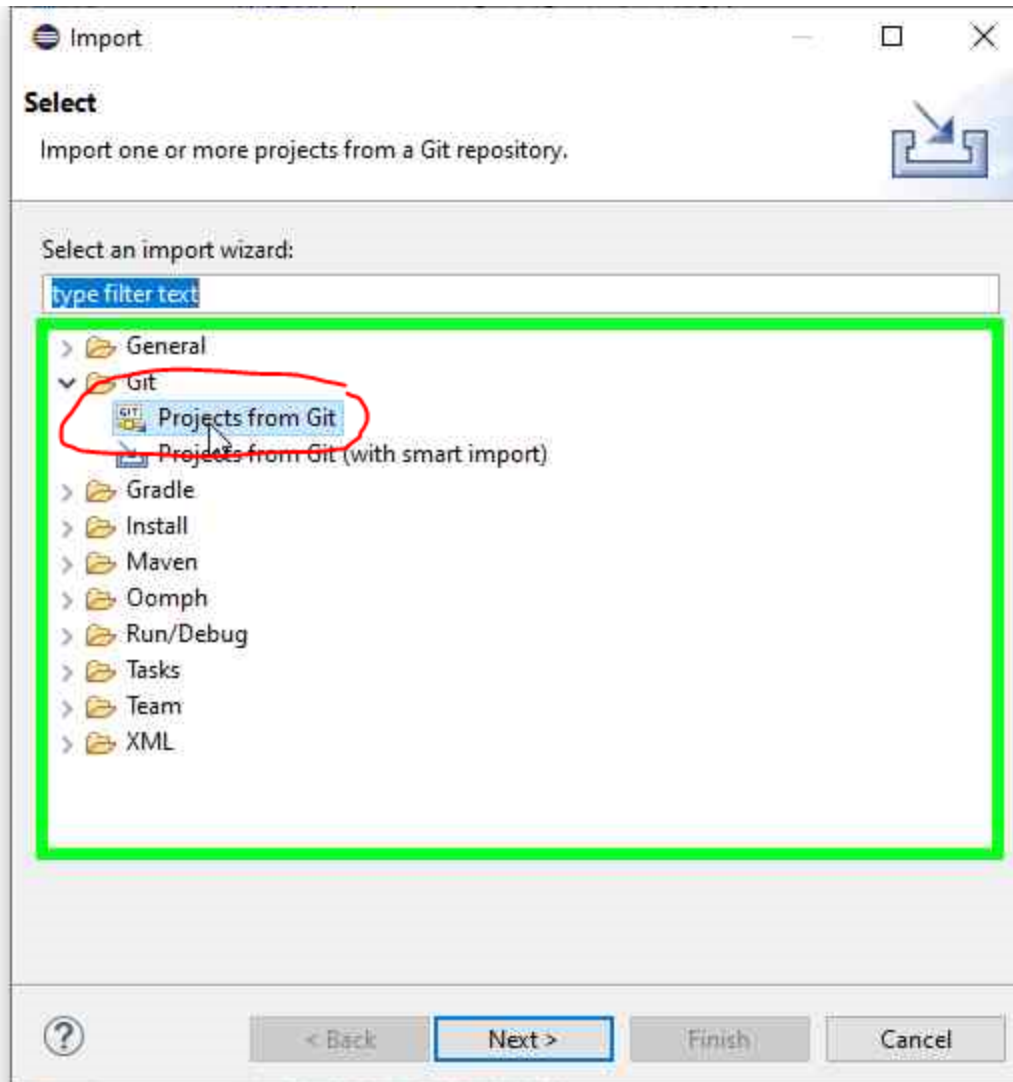

3. Copy the Link by clicking the button shown below:

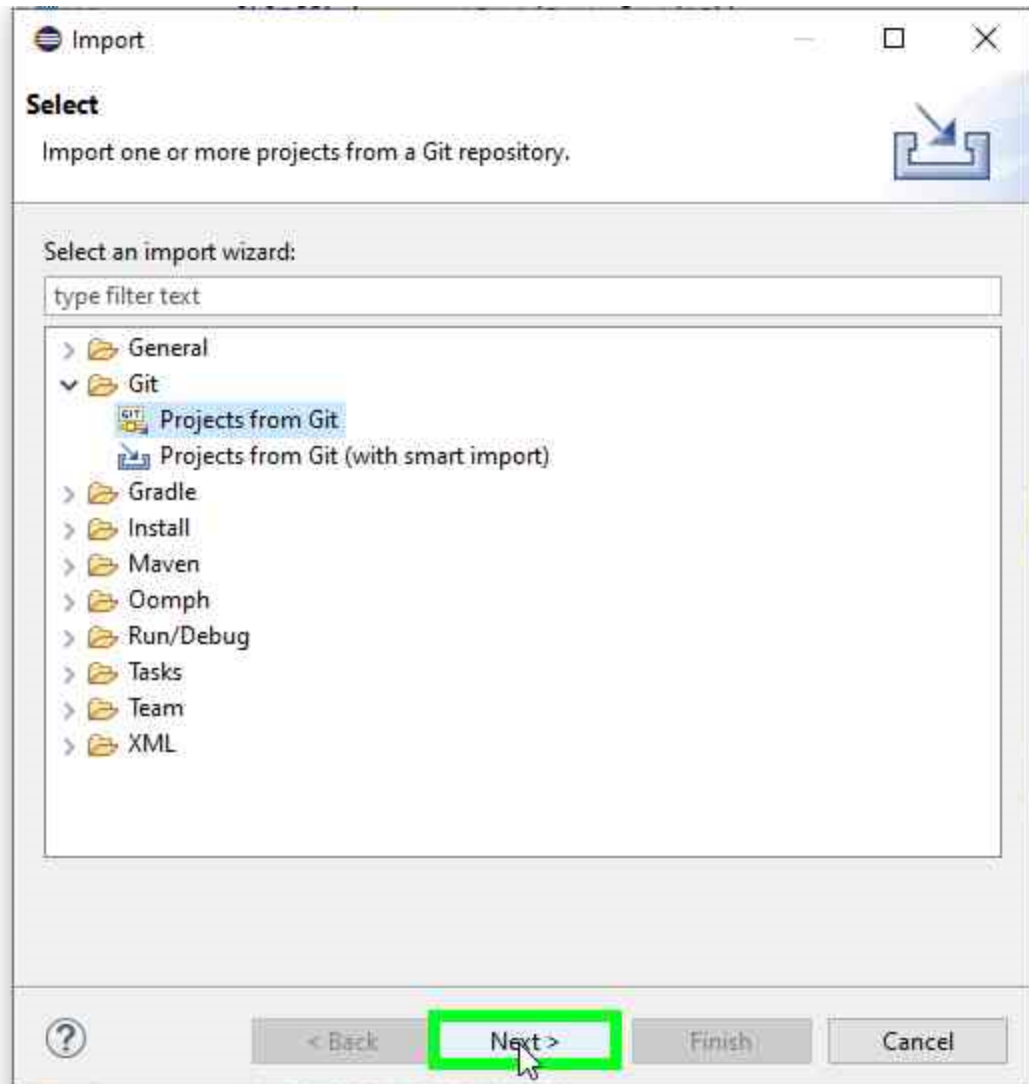

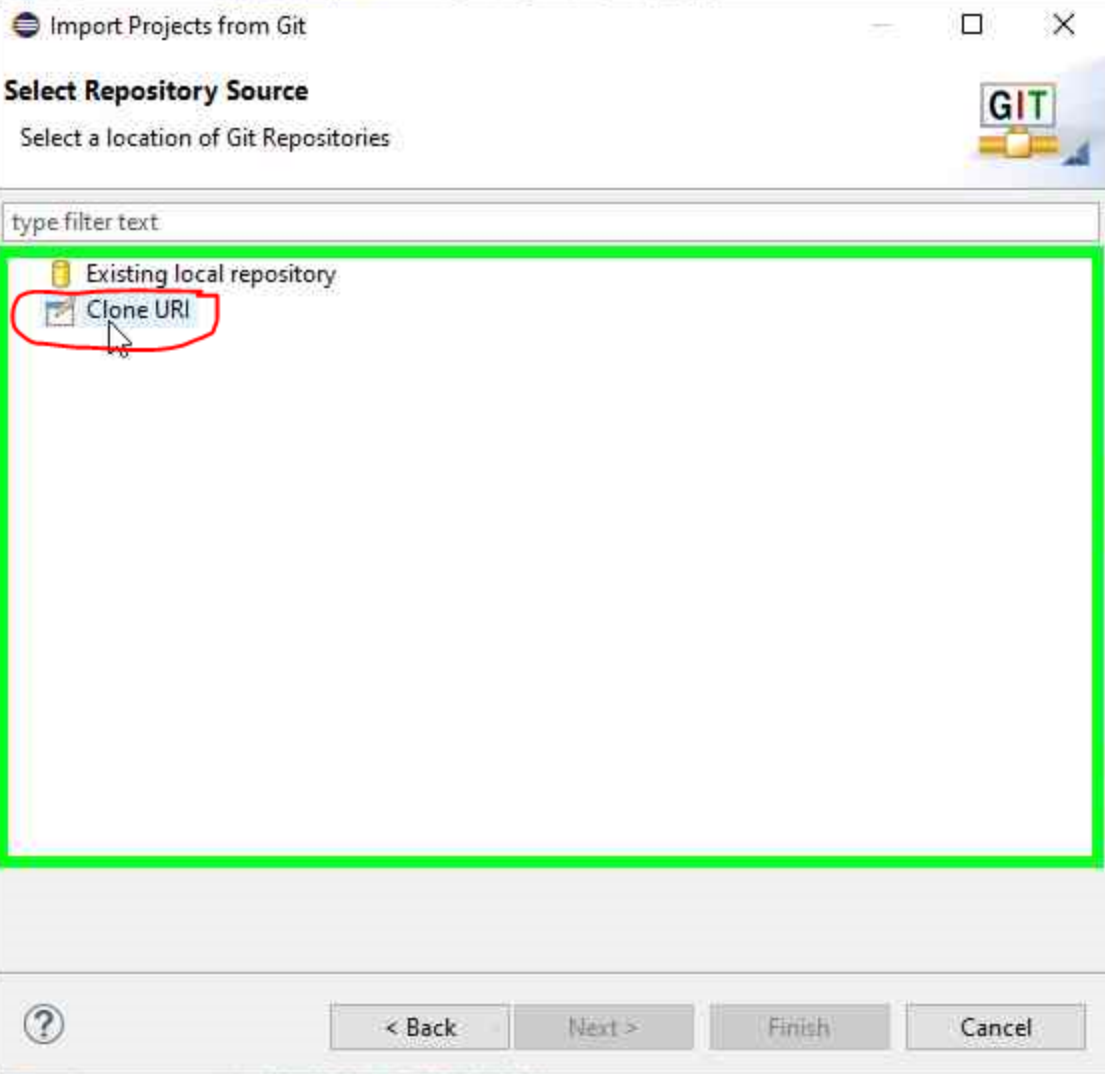

4. Open Eclipse (or other IDE) and import Project from Git as shown below:

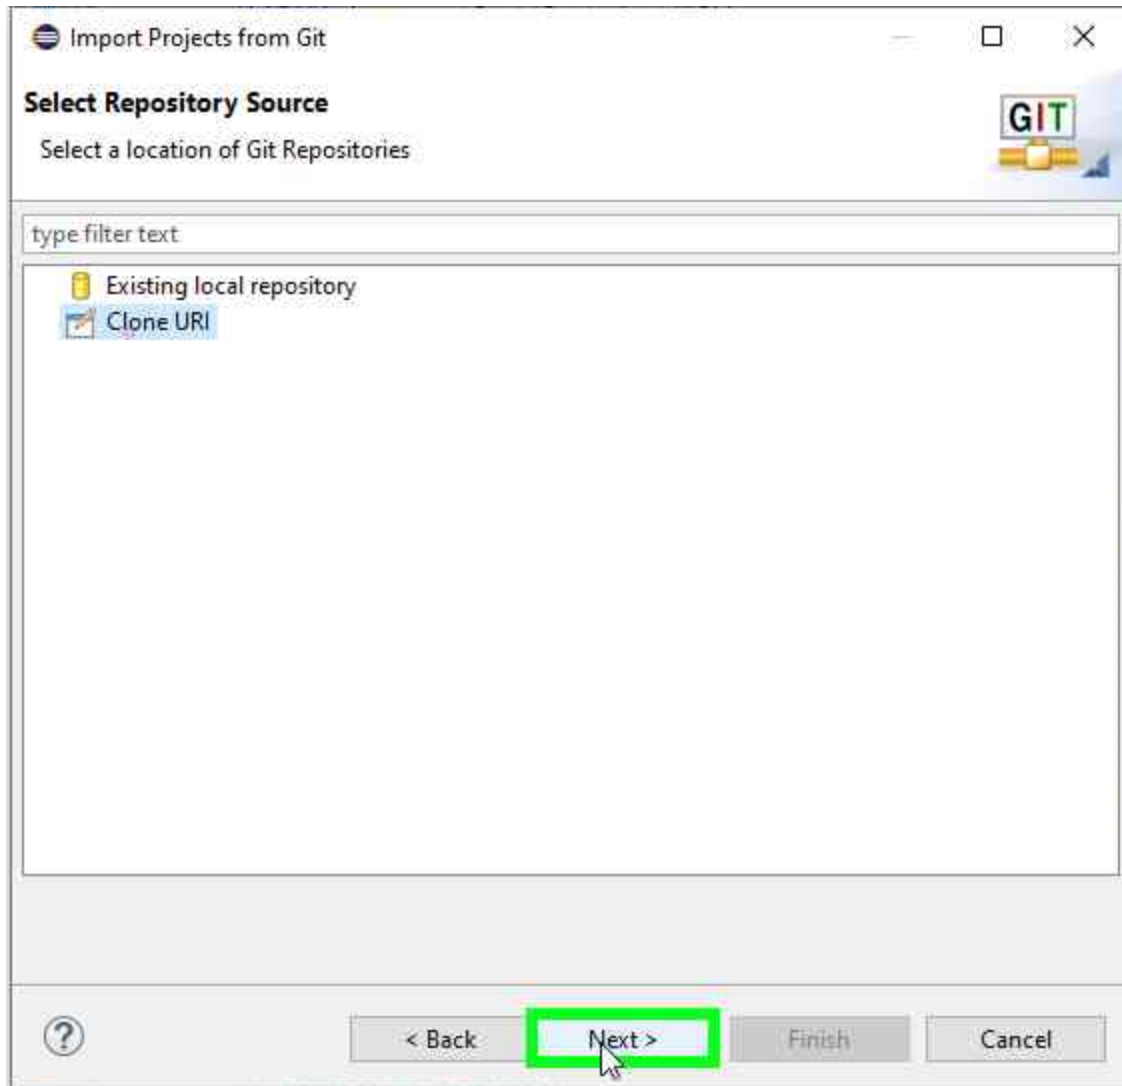

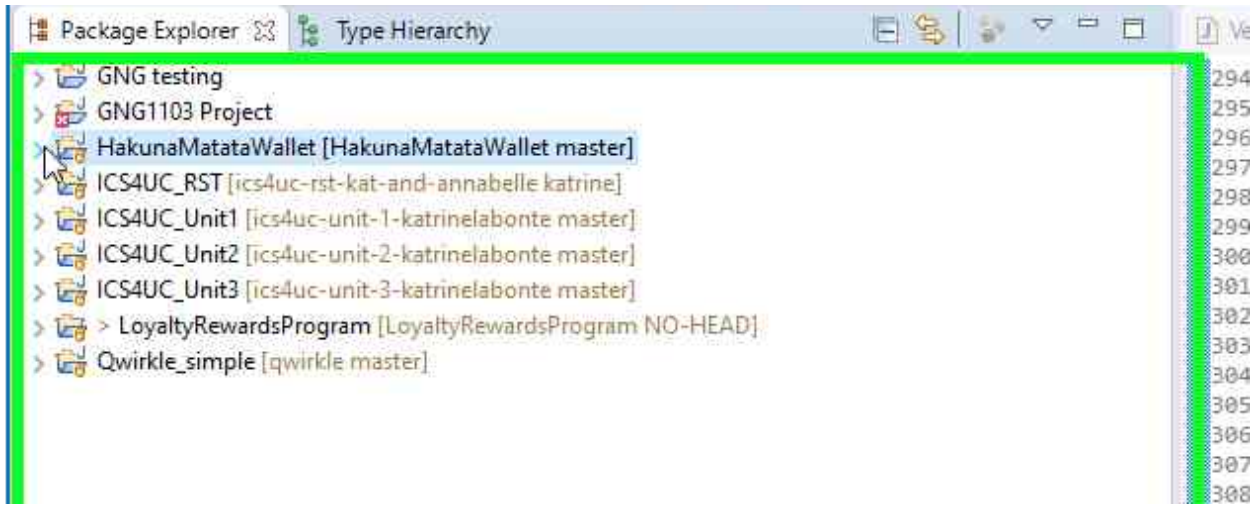

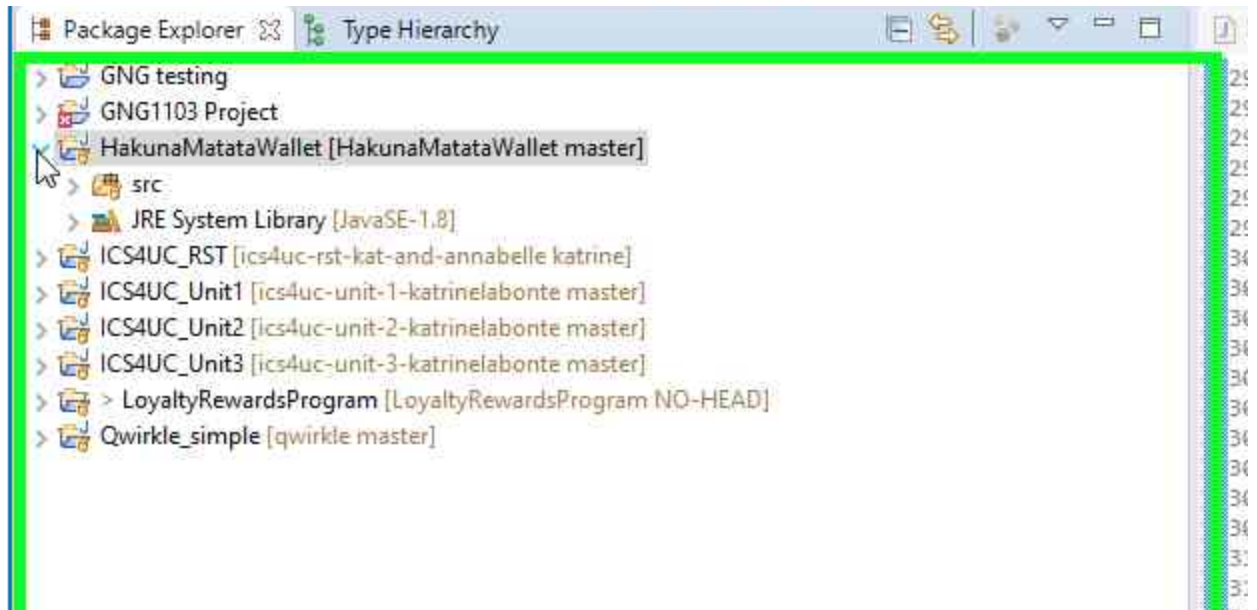

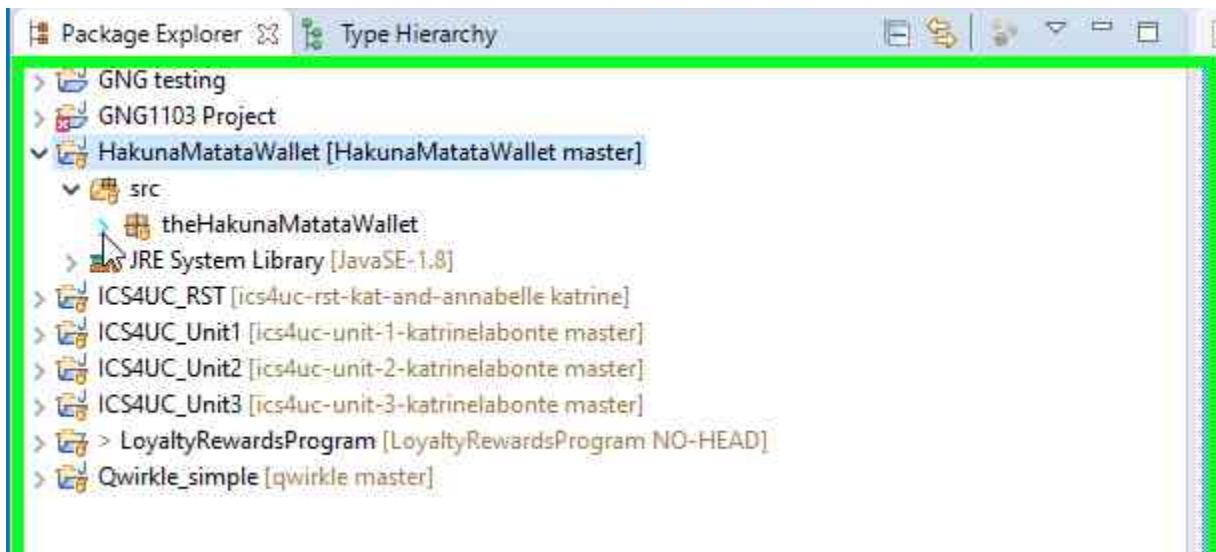

5. Follow Cloning Wizard Instructions (enter authentication info, choose a directory to import to, etc.) The only data you need to input is authentication information, default settings can be used for everything else (just keep clicking Next, and then Finish).
6. Ensure you are in Java perspective

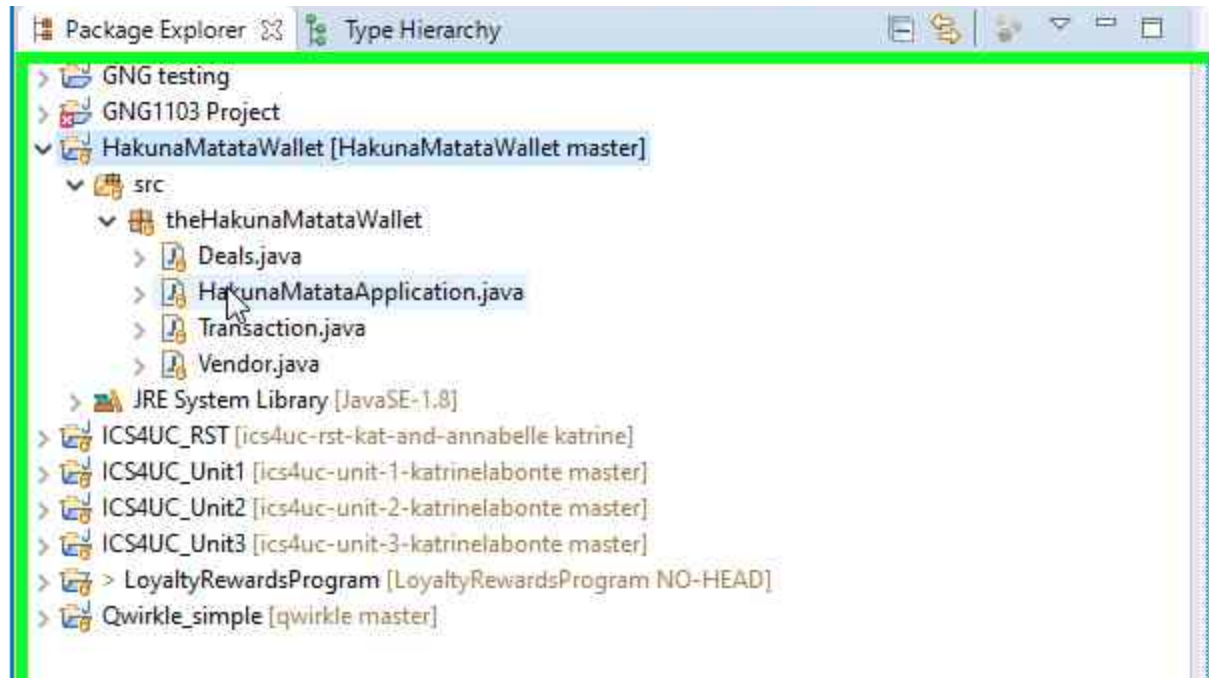

7. Open "HakunaMatataApplication" File

8. Run the program (the application should pop up on your screen!)
