

Project Deliverable 1: Design Showcase Presentation GNG 1103

Dream Team Group 8 Ibrahim, Ramtin, Semilore

All pictures of materials and pitch for design day:

This will include our prototype, a sample of a fresh propellor vs a sample of one of our propellers after erosion testing in salt and sand as seen below. We will have a board attached with pictures and a laptop with a presentation on it to pitch during the presentation

 Pictures

Project Summary:

Dream team focused on making the prototype simple, modular, and cost effective. Even though the final prototype was a lot different than the concept, the prototype proved to still be effective at accelerating erosion and met most of the criterias that the client requested.
