

A stylized, light gray bird logo is centered on the page. The bird is depicted in profile, facing right, with its wings spread. The wings are composed of several overlapping, curved shapes that create a sense of motion and depth. The tail feathers are also stylized, with several distinct, curved shapes. The entire logo is rendered in a light gray color against a solid black background.

Overview

Problem Statement

Autonomous weapons raise several moral and ethical concerns that decision makers need to be made aware of.

It is important for decision makers to start negotiations on these weapon systems before they are available to use.

Politicians and diplomats still see this issue as theoretical, and they don't see how such a revolution in warfare would have a major impact on many individuals.

Solution

Our task was to design a virtual reality experience that shows the ethical and moral issues that autonomous weapons raise. We had to take this problem and make it into a reality for decision makers.

Humanitarian disarmament organization with advocacy, research, capacity building, youth engagement and gender as its pillars. They are fighting a digital dehumanization battle as autonomous weapons turn people into simple numbers used to decide who lives and who dies, violating international humanitarian law.

Design
Criteria **02**

Design Criteria: Functional Requirements

Design Specifications	Relation (=,< or >)	Value	Units	Verification Method
Space required	<	1	m ²	Estimate, test
Headset model	=	HTC Vive	N/A	Testing
Ease of use	=	Yes	N/A	Testing
Languages	=	English & French	N/A	Testing

Non-functional Requirements

Design Specifications	Relation (=, < or >)	Value	Units	Verification Method
Graphic imagery	=	Yes	N/A	Testing
Safety (low range of motion)	=	Yes	N/A	Testing
Reliability	=	Yes	N/A	Testing
Realism	=	Yes	N/A	Testing
Call to action at end	=	Yes	N/A	Testing
Aesthetic appeal	=	Yes	N/A	Testing
Relatability	=	Yes	N/A	Testing

Constraints

Design Specifications	Relation (=, < or >)	Value	Units	Verification Method
Violence	=	No	N/A	Ensure/Analysis
References to real world entities	=	No	N/A	Ensure/Analysis
Health conditions	=	Yes	N/A	Ensure/Analysis
Cost	<	400	Dollars (\$)	Estimate
Duration	<=	5	Minutes (min)	Estimate
Delivery time	=	3	Months	Estimate
Feminist/anti-racists	=	Yes	N/A	Ensure/Analysis
Operating conditions	=	Enclosed environment	N/A	Ensure/Analysis

Benchmarking

Values	Colours	#
High	Green	3
Average	Yellow	2
Low	Red	1

Specifications	Importance	Product 1	Product 2	Product 3
Product Name	-	Bear 71 VR	Meet your carbon footprint	Universe Sandbox
Company	-	National Film of Canada	United Nations Environment Program	Giant Army
Cost	3	Free	\$26.99	\$38.99
Duration	3	30 minutes	5 minutes	No limited duration
Graphics	2	Simplistic	Stylized	Realistic
Emotional Stimulation	3	High Sentimental value	Abstract interpretation	No emotional value- purely educational

Chosen Concept

Storyline

- Short, concise, engaging.
- Takes in user input at various points.
- Clear idea of the consequences of autonomous weapons.
- Modern day setting.

Control Scheme

The scheme prioritizes simple control activity. We decided to minimize movement by:

- Allowing only hand movements, so no walking around
- Movement of the head - which will trigger next scenes
- Choosing options will be present, this allows some freedom to the user
- Teleportation

Audio

- Provide useful background information regarding autonomous weapons
- Guide the user through the experience
- Ensure the user gets the most immersive experience
- Sound effects
- Bilingual dialogue

User interactivity

User interaction to move the story and take advantage of VR features. Setup consists of:

- Head mounted display
- Two hand tracking controllers
- Point and click (teleportation)
- Yes/No dialogue

Art Style & Accessibility

Realistic as much as unity can go (effective not futuristic or science fiction-like in current time, so it is relevant.

- No bright colors. (fits the context)
- No flashing imagery
- No graphic violence (as desired).

Plan**

04

Project Schedule

Project Risks

Risks	Impact	Importance	Probability of occurring	Solution
Program crashes	Moderate	2	High	Ask the TA or PM for experienced help, extensive testing during development.
Equipment failure	Moderate	2	High	Notifying TA immediately, backup VR sets
Data loss	High	3	Low	Periodic cloud backups, source version control
Time management	Moderate	2	High	Organizing and planning our task according to upcoming due dates, using Wrike, etc.
Group conflicts	Moderate	3	Low	Communicating continuously, working together, helping one another and solve any conflicts that come up.

Project Cost (BOM)

Part #	Part Name	Description	Quantity	Unit Cost	Extended Cost
1	Personal computers	Provided by university	5	N/A	N/A
2	Unity	3D game engine. Student/personal edition used	1/student	N/A	N/A
3	HTC Vive	VR set, provided by university	1	N/A	N/A
4	Unity Assets & Packages	Unity Assets & Packages	16	\$20.00	\$22.60

05

**Prototypes
& Customer
Feedback**

Prototyping Test Plan

Test #	Test Objective (why)	Description (what)	Results (how)	Estimated Test duration (when)
1	Scene settings	Scene implementation, asset integration	Realistic, captivating and storytelling	3 hr
2	Model Animations	Sequencing animations correctly	Realistic and captivating interactions	3 hr
3	Camera Angles	Ensuring player vision is focused where needed	Find the best perspectives that showcase scenes	1 hr
4	Control Scheme	Method to interact with game	Measuring ease of use and learning	3 hr
5	Audio	Sound effects, ambience	Clear, captivating, bilingual	1 hr
6	User Interactivity	Integrating scene flow with VR	Teleportation method; encourages user participation	3 hr

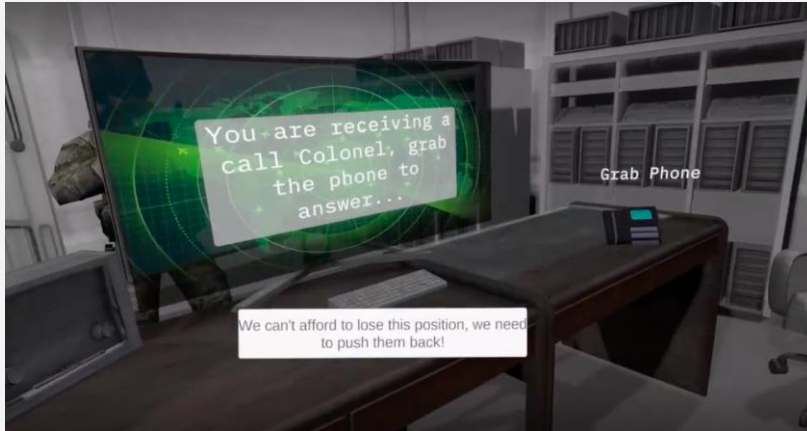

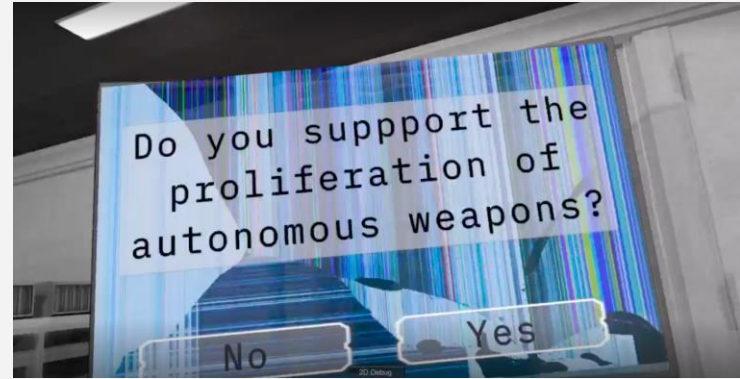

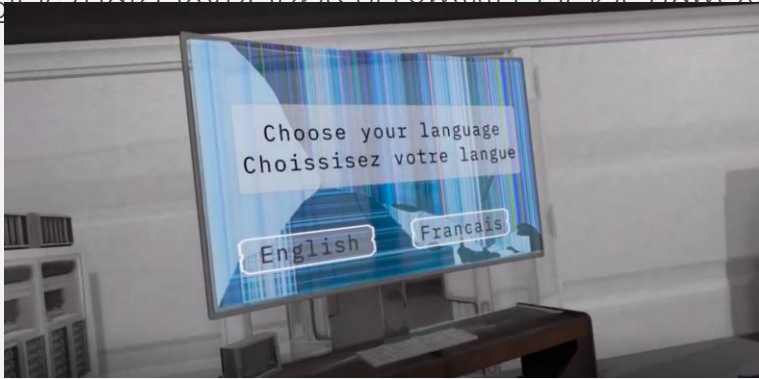

Prototype I

https://uottawa-my.sharepoint.com/personal/salsh036_uottawa_ca/_layouts/15/guestaccess.aspx?share=EcYrxanYNChAsL0zYz1CWBkBXZBfl866a8f7R_Rqn-sXcg

Prototype II

https://uottawa-my.sharepoint.com/personal/salsh036_uottawa_ca/_layouts/15/guestaccess.aspx?share=EbadTumEY6lOo70cLcOoYBOPrAS_f18mWEGOCkA_Dam2vg

Prototype III

A low-angle, black and white photograph of several skyscrapers reaching towards a cloudy sky. The perspective is from the ground looking up, creating a sense of height and scale. The buildings are dark against the lighter, overcast sky. A white rectangular frame is superimposed over the center of the image, containing the text.

**Final
Product**

06

Customer Feedback

First Client meeting feedback

- Client requested changes to storyline
- Approved of all other subsystems

Customer feedback during design day was greatly positive

- Client appreciated changes integrated into storyline
- Most testers remarked on scene flow and ideas portrayed
- Judges that did play the game found it easy to learn and got the message.

Final Product

If it isn't prevented, this could be a possible outcome in the near future.

Features of final prototype

- Each scene depends on player explicitly performing an action, ensuring player attention where needed.
- Fully bilingual, from voice acting to subtitles and tooltips. Language depends on player in game choice.
- No flashing animations, accessible to wide audience
- Avoids graphic imagery, while still showing seriousness of subject

07

More

Challenges & Lessons Learned

- Most of us aren't experienced in coding
- Difficult to work on the school computers (unavailable)
- Time Management
- Uploading and copying our files took a lot of time
- Learning how to use Unity for the first time

- Communication is key
- Important to stay motivated & open-minded
- Patience is important
- Focus is a prime aspect in succeeding
- Organization is a must

Thanks
