

Design Presentation Stadium Experience

By: Elliot, Isabella, Caleb, Archie, and
Stella

Who cares - basic solutions/alternatives

- The user must know about dashboard's functionality but our solution will be very simple to understand.
- Our current solutions is to display each team's logo, Mascot, and players because we think that displaying each team's mascot will excite the fans even more.
- An alternative solution is to display game highlights and stats throughout the game to keep the fans interactive.

So what - Motivate the problem

- As going through the design process there was a need to solve the problem faced by Ross video and the Ottawa 67s Scoreboard Show.
- To prepare the fans for a better experience especially for the transition to in person games. We were specifically concern to give the fans of Ottawa 67s Scoreboard Show the best experience .
- As engineering students and especially because we learnt the design process which teaches us to emphasize , it was more than an option to propose a solution to the problem faced by OSEG and Ross video.

Why you? Why now?

- As we transition to in person games what a better time than now to propose new and fresh content to the fans of Ottawa 67S game show.
- What makes our design better is the fact that one of our team member played hockey before so he knows what is already available and what to improve on to make the fans happy.
- Our design is also easy to understand every button has a specific purpose. This is important for hockey game where everything goes quickly.
