

OCD Immersive Experience

Solder Boys – Team B 3.4

30/11/2023

What's the Problem?

- People live different lives with different challenges.
- A lot of people suffer from disabilities and disorders which affect their quality of life.
- Most of us never get to “walk a mile in someone’s shoes”.

The Problem

People often don't get to experience the viewpoint of others, which creates a hurdle towards fostering empathy among ourselves, especially to who may suffer from disorders and disabilities.

Why Should You Care?

- Community and Societal Support
- Personal Growth and Human Connection
- Educational Awareness
- Global and Local Impact

Current / Available Solutions: Paid Courses

Our Solution!

A VR experience covering **OCD** that strives to **foster empathy** by allowing the user to go through a sample of someone's **life experiences** who suffers from such a disorder.

- A cohesive, coherent, well-written story to convey our message.
- A reflection section to help the user empathize more at the end.

VR Experience

- Easy, simple, and a short way of helping foster empathy.
- Easily Accessible
- Accurate Representation
- Story portrayal makes it more immersive.
- Helps users reflect on their experience.

oo! I can't wait to go out with my friends today. They said we'd meet at 6.
It's 5:45, so I should probably start heading out

Thanks for listening!
