What is it?

- A compact, portable solution to monitor pollution levels
- Easy to use!
- Comes with a web app
- Also doubles as a powerbank for charging on the go

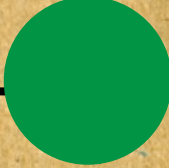

Why do you need it?

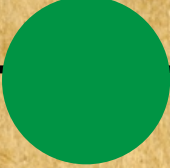

Monitor your environment

Be aware of what is in the air you're breathing in

Pollution Data Analysis

- Collected data is stored for later analysis
- Are EVs helping in reducing pollution?
- Predict future pollution levels?

Minimal user interaction needed

Only has an ON/OFF switch for interaction

Portable

- Attach any mount to it and make it easy to carry

Improves airflow to sensors
for increased accuracy!

O-rings and sealant used
for ingress protection

Isolated air channel to
protect circuitry

Smaller than an iPhone 14

Pollutant readouts and simple display symbols

Charge the unit or your phone here!
