Deliverable H

Jake Lund, Dominic Roy, Mahmoud Younis, Gilles Tang

Project Group 16

For the third and final prototype of our project, we made sure to add certain final touches to our second prototype, although we didn't change much of the basis of our project, we added certain changes to the overall design of our website and our prototype.

Homepage:

Airte						

- We re-distributed the elements on the Homepage to make it more organised
- Added a table that is daily updated to show the value of other brands points compared to our own loyalty program

Other changes:

- To have a real website to use and present instead of in the editor, which is a more intuitive observation of the quality of web pages
- https://myoun118.wixsite.com/ourloyaltyprogram
- Fix the connection between the pages which used to cause unable to exit questions

Redeem Page:

- Replaced the original placeholders with images of potential rewards for clients to purchase
- Added points values based on the retail value of the product
- Spread the interface out to make it cleaner and less cramped together
- Added "prev" and "next" buttons at the bottom of the page
