Prototyping Test Plan Results

Initial plan

Below is the test plan used to test our first prototype.

Test ID	Test Objective	Prototype used and the test method	Results to be recorded and their function	Estimated test duration and start date
Customer Feedback	<ul style="list-style-type: none">- Gain an understanding of the client's suggestions on the prototype and what we should improve on.- Emphasizing the uses and their opinion on the circular learning centre/glass dome.- The last client meeting indeed with the client needing answers from their boss. Definitive answers will be provided this meeting.	Prototype 1	<p>The results recorded will be the answer to these questions...</p> <ul style="list-style-type: none">- What is the capacity of the learning centre?- Is the glass design to their liking?- Would they like to put the space to specific use? Or keep it an open concept?- Any other questions about the rest of the building.	<p>Start date: Nov 7, 2023</p> <p>Estimated duration: From the start date, until the feedback is received.</p>

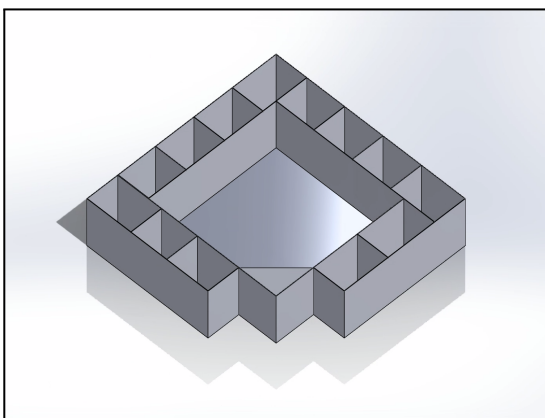

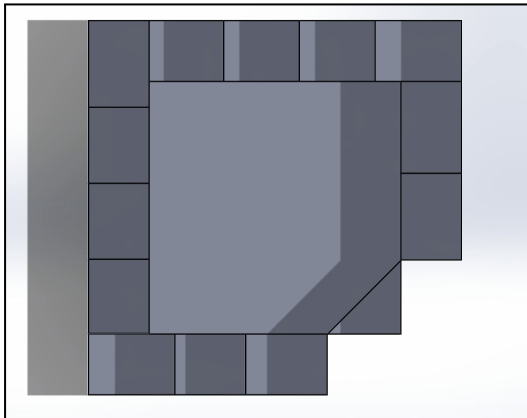

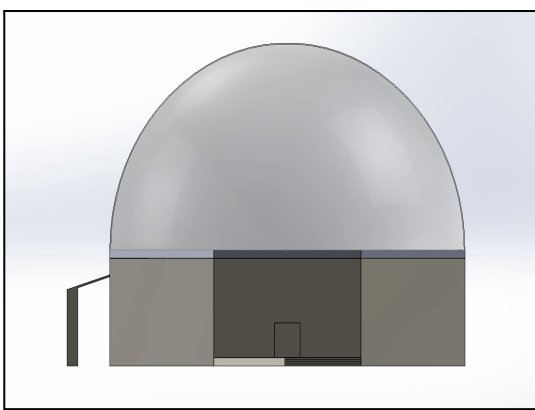

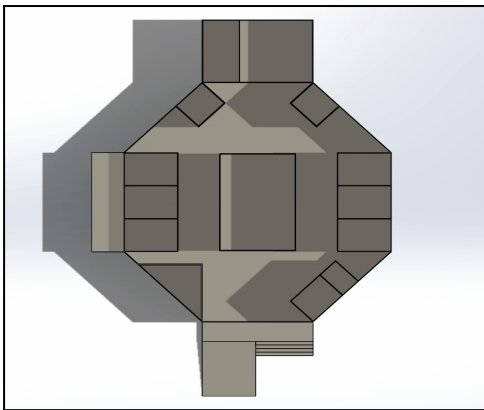

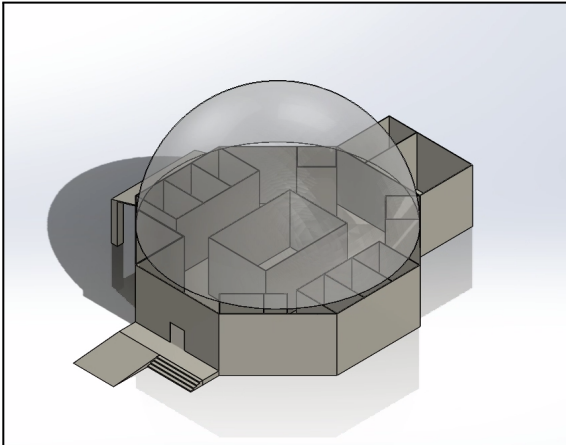

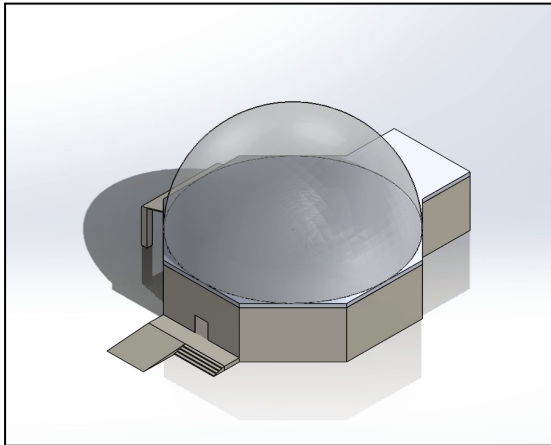

Feedback given

We have still yet to receive our client feedback from the last meeting.

Changes made to Prototype 1

As we have yet to receive our client feedback, the changes we have made from our first design resulted from listening to comments made by the client during the meetings with the other groups. We have decided to add a basement area to accommodate more offices. This came from the client expressing to a group that their 14 offices were a good amount. This is already included in our initial BOM as we included it with the idea that we would have to add another floor and more offices.

Prototype 2

Updated Prototyping Test Plan

Test ID	Test Objective	Prototype used and the test method	Results to be recorded and their function	Estimated test duration and start date
Peer & Client Feedback	<ul style="list-style-type: none">- Use people unfamiliar with the problem statement to gain an understanding of the design and functionality of the building from the public's eyes.- Use the client feedback from the client meeting to compare our design to what they want changed.	Prototype 2	<ul style="list-style-type: none">- People's opinions on different areas of the building, based on both aesthetic and functionality.- The client's feedback and how it compares to our design.	<p>Start date: Nov 12, 2023</p> <p>Estimated duration: Until Nov 26, 2023</p>
